

**Student Name Here**  
**Program Name Here**  
**School Name Here**  
**Case Manager:**

**Date:**  
**Class/Setting:**  
**Minutes Observed:**

**Target Behavior:** When the student is frustrated, she engages in negative communications with teachers and peers (whining, making frustrated noises such as grunts, asking repeatedly for help then becoming irritated when help is given, refusing to use strategies to de-escalate such as taking breaks for completing shortened work, complaining to/at peers, etc.)

**Data Summary: Add up all the interval data and put it in this chart at the end of class.**

\*Need a minimum of 4, 20-minute observations in both special education and general education settings.

<p>Inappropriate communications</p> <p>Add up all of the inappropriate communications tallies and put that number over 20 minutes.</p>	<p>The student averaged _____ inappropriate communications with teachers and/or peers during a 20-minute observed interval.</p>
<p>Appropriate communications</p> <p>Add up all of the appropriate communications tallies and put that number over 20 minutes.</p>	<p>The student averaged _____ appropriate communications with teachers and/or peers during a 20-minute observed interval.</p>

Each time the student engages in a negative communication (see Target Behavior), mark a tally in the inappropriate communications column. Each time the student engages in a positive communication (asking for help appropriately, using manners, expressing emotions appropriately, etc.), mark a tally in the appropriate communications column.

<p>Inappropriate Communications (tallies):</p>	<p>Appropriate Communications (tallies):</p>
<p>Descriptions of inappropriate communications observed.</p>	<p>Descriptions of appropriate communications observed:</p>
